NSK6500

NEW SOLUTION SERIES

The ultimate in quiet versatility

It actually is possible to get a case that combines versatility, capacity, quiet and high-efficiency power. The NSK6500, part of Antec's new Solution Series of enclosures, combines ease-of-use features like a removable 3.5" HDD cage that holds 5 removable trays with Quiet Computing™ technology and a high-efficiency 430W ATX12V v2.0 power supply with universal input and active PFC. Indirect front bezel vents and silicone HDD mounting grommets minimize noise while the crisp, understated styling minimizes attraction in your office.
